

FOODS FOR YOUR LIVER

Don't overeat and avoid heavy or fatty foods. This includes nuts, butter, animal fats, excess meat and excess bread.

Avoid all preservatives or chemically treated foods.

Always sit down to eat and simply enjoy the meal without reading, watching television or excess talking.

It is better to eat frequent small meals rather than a couple large meals to stabilize the blood sugar and please avoid late night eating.

Using a zinc supplement especially prior to menstruation is advised or incorporate high zinc foods such as pumpkin and squash seeds or alfalfa sprouts.

Chew your food well.

Avoid all intoxicants- alcohol, tobacco, caffeine.

Exercise at least 20 minutes each day.

Express your emotional experiences in a healthy non-threatening way to others. Avoid harboring anger or resentment.

Gravitate towards laughter and joyful experiences.

Practice deep breathing exercises such as meditation.

Avoid hormonally treated animal products (especially women) which increase estrogen levels in the blood.
